

Canada's Performance Acoustic Panels

The **Q12**, **Q24**, & **Q48** are wall-mounted and ceiling-mounted acoustic panels designed for use in offices, churches, boardrooms, recording studios, classrooms, home theatres, gymnasiums, community centres, and any space requiring acoustic treatment.

DETAILS

APC panels offer an inexpensive, hassle-free way to address sound issues: Smaller rooms require only 4 panels. Our panels fix the most common audio problems, including:

- ✓ Reverberation & echoes
- ✓ "Muddy" dialog and speech
- ✓ Poor stereo imaging
- ✓ Inconsistent bass

With a sturdy frame and broad colour palette, APC panels visually complement any space.

The lightweight panels are easy to handle, and inexpensive to ship. Installation can be done by a single person in minutes.

Sound Absorption Coefficients

Octave Band Centre Frequencies (in Hz)						
125	250	500	1000	2000	4000	NRC
0.19	0.55	1.03	1.06	1.02	1.01	0.90

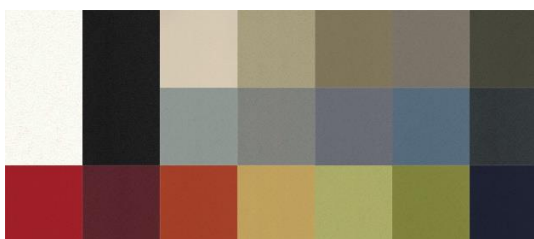

KEY FEATURES

- **Q48:** 61cm x 122cm, 3.6Kg (48" x 24", 9lbs)*
- **Q24:** 61cm x 61cm, 2.2Kg (24" x 24", 5lbs)*
