

Your wall stickers

Our wall stickers are made from an innovative polyester fabric with a removable glue back. They can be removed and repositioned without damaging the wall and no residue, it will not wrinkle or rip. Our stickers are suitable for smooth non-glossy walls. Stickers need to be applied onto clean and dry walls.

Before application

You should wait at least 5 weeks after painting walls before applying stickers onto it. It is recommended to roll out the sticker sheet flat for a couple of hours to help it 'relax' after being rolled up in transit. Make sure to TEST our stickers using the provided test sticker.

Please note: NOT all types of paints are suitable for wall stickers application. Paints including latex or some "eco" branded paints might not allow the adhesive to dry properly causing some stickers to lift around the edges or even not stick at all. Should your test sticker demonstrate any problems with sticking, please contact us and we will be happy to help or arrange a return and a refund.

Stickers application

Each sticker is cut individually, simply peel off the sticker and place it on the wall. Stickers are repositionable however placing it onto the wall and unpeeling several times can cause loss of tack/glue. For larger stickers we recommend two people for the application. Please note if your walls are freshly painted or dusty our stickers will pick up the dust or fresh paint and it can cause a loss of the tackiness.
