GPSi 4300

Portable Inverter Generators

Convenient and rugged portable power

The GPSi 4300, with electric start and four wheel transport kit, is an easy to operate, portable inverter generator that offers clean 120V AC power that is ideal for powering small tools and sensitive electronics. It's a great choice for residential or recreational applications, but is rugged and powerful enough to meet the demands of the construction industry.

- Inverter technology allows for variable engine speed that automatically adjusts to the power needs of the connected equipment, reducing operating costs and extending time between refueling.
- Integrated flywheel and generator design results in compact, lightweight unit that is quiet and fuel efficient.
- High surge capacity provides for output as high as 120% over rated power for up to 20 seconds.
- Multi-monitor information display shows the generator performance, voltage, frequency, hours of operation and if present, overload condition.
- GFCI portected 110V duplex outlet for personal protection.
