Print on three sheets of A4 at 100% - do not use *scale to fit*. Do not use *borderless* setting (some printers will enlarge the image if set to borderless). There should be some overlap on each page. Use alignment marks when joining sheets together. Cut out, including the dotted lines. Test fit for your frame.

When printed, the square around the REV logo should be 110mm x 110mm, the overall width of both battery positions should be 385mm. The overall height of both battery positions should be 181mm.
