This guarantee that the dehumidifier is able to maintain the humidity level low (below 50%). The biggest source of moist indoors is outside humid air.

## Key Features

- GLGR Technology
- Supper COP:2.0L/KWH
- HVAC Remote System
- Smallest Size
- Quick Access for Service
- Draining: Pump, Gravity Drain
- Rare Earth Alloy Tube Evaporator

Specifications	AirWerx 35P
Installation type/place	Small spaces-basements, crawl space, kitchen, laundry room
Power	115V/60Hz
Current	2.9A
Size limit	Up to 1,000 Sq.Ft.
Filter	MERV-1 Filter
Air flow	115 CFM
Installation type	Portable
Display type	Digital
Sound level	<50 dBA
Refrigerant	R32
Feet	Adjustable Feet
Draining	Pump, Gravity Drain
Defrosting control system	Auto Defrosting
Easy handling	Plug and Play Design -Easy to Operate
Functioning Temperature Range	33-105°F
Weight	39.7 lbs
Dimensions (L x W x H)	15.35×11.2×11.4 inches

## Overview

The AirWerx 35P is also able to extract over 70pints of moisture a day. This ensures you are protected from water damage and avoid any health complication caused by excess moisture. Its sheet metal housing guarantees durability by protecting the dehumidifier from damage while being moved.

Equipped with MERV-1 filters that help cleanse the air off any dust and impurities, auto defrosting system to avoid frost from forming and lowering the dehumidifier capacity. The AirWerx 35P state of the art design protects it from overheating.

## Application

Compact-small-light-high capacity! These are but a few of the words that can be used to describe BaseAire AirWerx 35P. The AirWerx 35P is built for all areas dehumidification, thanks to its small size and high capacity makes it perfect to be deployed in any room in the house. Perfect for basement, crawlspace or any other tight moist spaces in the house.
