

Macrame Hanging Hammock Chair

CAUTION If you are not familiar with construction, hardware or the use of tools, please use a qualified general contractor to install. Improper installation may cause injury.

Safety First: Before entering a hammock chair, inspect your hammock chair, hardware, installation points and objects supporting your hammock chair for wear or weakness. Proceed carefully and take your time getting into and out of your hammock chair. Any hammock chairs may tip if your weight isn't centered. A hammock chair is not a playground swing or a trampoline. Excessive swinging and other rough play may result in falls and may wear out your hammock chair and hardware prematurely. Small children should not play unsupervised in your hammock chair.

Hammock Care and Maintenance:

To prevent mildew and increase the useful life of your hammock chair, store it in a dry location during seasons and time periods when it is not in use. Avoid keeping in direct sunlight and rain for long durations. Some fading may occur.

Cleaning:

Your hammock chair is hand washable with cold water and a mild detergent or soap. Do not use harsh chemical cleaners or bleach. Rinse well and let it dry thoroughly before storing. Keep rope and loops away from fabric while cleaning.

Storage:

Make sure the hammock chair is completely dry before storing in a dry location.

HANGING OPTIONS (hanging hardware or stand sold separately)

Take proper safety precaution when hanging Macrame Hanging Hammock Chair. Since most hammock chairs are hand crafted, you should measure the overall height of your hammock chair, in order to determine the best hanging option for use. When installing Hanging Hammock Chair outside make sure that it is no less than 6 away feet from any obstruction such as fence, garage, house, overhanging branches, laundry lines or electrical wires.

Overhead Beam Mounting (Porch, Patio Or Deck) – When installing the hammock chair, make sure the beam is strong enough to support the weight of the person using the hammock chair. The components of the hammock chair will stretch slightly when you sit on it for the first time. Keep this in mind when determining the height to install the hammock chair from the floor or ground. The hammock chair should be 2-3 feet off the ground. Pre-drill a ¼" diameter hole into the beam. Then screw the eye screw with swivel hook all the way in and make sure is in tightly. Then hook the ring at the end of the ropes onto the swivel hook. *****IMPORTANT: WHEN USING EYE SCREWS, MAKE SURE TO TIGHTLY SCREW IN THE EYE SCREW ALL THE WAY IN THE BEAM.*****

Tree Mounting – When installing a the hammock chair, make sure tree branch is strong enough to support the weight of the person using the hammock chair. Select a tree branch with a minimum of 12 inches in diameter and that is about 9 feet above ground. The hammock chair should be 2-3 feet off the ground once it is installed. Appropriate hardware like tree strap and S-hook are needed for support and attachment to tree. Check with your local hardware store to determine the size of the rope, chain, or "S" hook.

CAUTION: Falling and Strangulation Hazard! Hammocks can be unstable. Be careful entering and exiting your hammock as injury may result. Children can become entangled in hammock strings. NEVER leave children or pets unattended in hammock.
