

POWDER-COATED ALUMINIUM BALUSTRADE SYSTEM GATES

Cladco metal Gates for Balustrade Systems are made from superior strength powder-coated aluminium. The Balustrade Gate can be used with the metal Balustrade Handrails and Posts also available. Gates, when used within the Balustrade System, can be installed onto Cladco Solid Composite Decking, PVC Decking or Timber Decking installations.

The powder-coated metal Balustrade Gate is available as a 950mm high section and 800mm wide. Matching Posts and Handrail sections are available to purchase.

The Balustrade Gate System should be secured to a metal Balustrade Post and used within the Cladco Balustrade System.

Balustrade Gates are strong, sturdy and durable alternatives to other gate options available on the market, offering superior strength and longevity. The strength of this Balustrade System gives peace of mind when using on the exterior of a decking installation. The powder-coated aluminium Balustrade Gate is made from extruded and welded aluminium, for a strong, low-maintenance and non-corrosive material which is then powder coated in black. These Balustrade Gates can easily be re-painted to match your decking installation or colour of choice. Balustrades Gates are manufactured and sold as complete Gates, no self-assembly is required and they are easy to fit between Handrail sections. To install a Gate within a Balustrade System simply add consecutive sections to achieve your desired length of Balustrade, then add a Gate between. Balustrade Gates can be used with Handrail sections and Posts for use alongside decking installations, walkways, balconies and more.
