

POWDER-COATED ALUMINIUM BALUSTRADE HANDRAILS

Metal Balustrade Handrails are made from durable powder-coated aluminium and are available in a range of sizes to suit your decking project. The superior aluminium Balustrade can be used with Cladco Solid Core Composite Decking, PVC Decking or Timber Decking installations.

Balustrade Handrails are available as a 1050mm high section and in widths of 1000mm, 1200mm, 1400mm, 2200mm, 2400mm and 2600mm. Matching Balustrade Gates and Posts are available to purchase.

The powder-coated aluminium Balustrade is made from extruded and welded aluminium sections which are strong, low maintenance and non-corrosive.

Balustrades can easily be re-painted to match your decking installation or colour of choice. Handrails are manufactured and sold as complete sections. No self-assembly is required and they are easy to install between Posts (sold separately). To create a Balustrade System simply add consecutive sections to achieve your desired length of Balustrade.

Balustrades can be used with Gate sections and Posts for use alongside decking installations, walkways, balconies and more. Each Balustrade Handrail can be finished with the side fitting brackets and foot caps included.

Features

Does not splinter, rot or warp
