

POWDER-COATED ALUMINIUM BALUSTRADE SYSTEM POST

Cladco metal Balustrade Posts are made from durable powder-coated aluminium, the same as Balustrade Handrails and Gates, and measure 1100mm high and 100mm x 100mm square. Each Post comes with a post cap and foot cap to give a high-end professional finish.

The metal Balustrade Posts can be used with the Cladco Balustrade System and can be installed on top of Solid Composite or PVC Decking Boards. Balustrade Posts can be easily secured to the Balustrade System using a hidden fixing method.

Metal Balustrade Posts are manufactured to a high standard, offering endurance and strength in even the harshest weather conditions, perfect for any decking project.

The powder-coated aluminium Balustrade Posts are made from extruded and welded aluminium sections which are a superior alternative to other Balustrade options on the market.

Cladco Balustrade Posts are low maintenance and manufactured with a non-corrosive powder coating in black. These Balustrade Posts can easily be re-painted to match your Balustrade System or decking colour.

Balustrade Posts are sold as complete Posts, no self-assembly is required. These posts are easily installed to the Balustrade System and finished with a cap and foot piece.
