FLEXITEC

Multi-surface GRP roofing system

One Resin. Countless possibilities.

Flexitec 2020 is the flexible GRP system that has revolutionised the merchant liquid roofing market. Like traditional fibreglass systems it is fast curing, extremely tough and can easily accommodate foot traffic.

However it is not just timber that it can be applied to as it can coat existing roof surfaces such as felt, concrete, asphalt, GRP, liquid and single-ply – meaning roofs can be overlaid without the need for strip and replace the existing substrate. No matter the size, shape or complexity of the roof, Flexitec 2020 provides a seamless, tough and flexible membrane to any roof or balcony area.

- Highly versatile and capable of coating virtually all common roof surfaces.
- Ideal combination of flexibility and toughness.
- One resin system for easy and rapid application times.
- Only 30-60 mins cure time per coat - genuinely rapid installations.
- Top rated fire performance (BS 476-3 Rating: F.AA).
- 20 Year Materials Guarantee accessible to trained installers.

RESTRIMS

Flexitec 2020 is fully compatible with the ResTrims range of pre-formed GRP edge details. ResTrims are made to be robust, tough and are designed to create a perfect detailing finish.

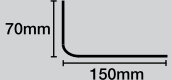

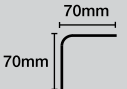

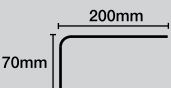

ResTrims are essential for new deck applications however for overlays, if the existing detailing is in a sound condition, trims are not usually needed.
