

Foam Fillers To fit 34/1000 Box Profile

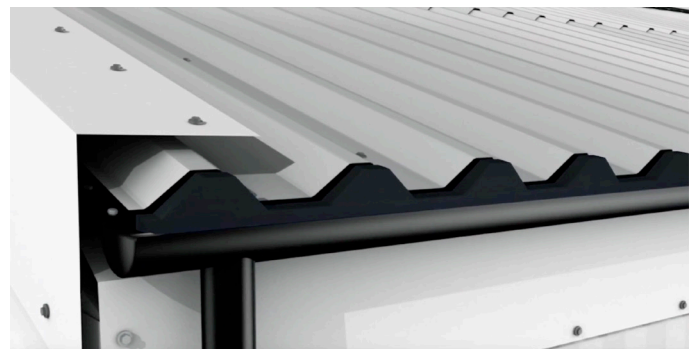

Polyurethane Foam Fillers are designed to fit and be used to close off the ends of Cladco 34/1000 Box Profile Sheets. The correct use of Foam Fillers will help to prevent the weather, specifically rain and snow, from getting in. It can also help to prevent birds and vermin from gaining access.

The 34/1000 Box Profile Filler fits between the final purlin of your building and the Roofing Sheets, with the other half fitting at the other end of the Sheet between the Sheet and the Flashing used to seal off the roof.

34/1000 Box Profile Fillers

These Foam Fillers can be held in place with silicone sealant, if necessary, and measure one-metre in width, produced using polyurethane. You can also find our Foam Fillers in 13/3 Corrugated, 32/1000 Box Profile and Tile Form Profile Fillers.

SPECIFICATIONS
