**Easily fitted.  
Superb flat roof finish.  
Lasting weather  
protection.**

From lengths of trim to corners and joints, each and every Integra Trim component is designed and manufactured to look great, fit together perfectly and deliver where (and when!) it counts.

Combining state of the art CAD (Computer Aided Design), uPVC extrusion and injection moulding processes to create the most efficient and reliable edge trim system available; Integra Trim solidifies the integrity of flat roof projects **and the installer carrying them out.**

Integra Trim Solid is precisely fitted and strongly bonded to ensure FlexiProof Fleece Backed EPDM membranes perform long-term - wind, rain or shine!

**More than just a flat roof trim system, Integra Trim is integral to your flat roof project success.**

## Integra Trim Solid Trim with Integrity

- The premium choice for the highest quality flat roof, all round
- Integra Trim Solid is ideal for installers used to working with/cutting solid uPVC products
- The complete Integra Trim Solid system is designed to meet high-end project requirements and budgets

### Superior Materials & Technology

- Expertly designed via high-end CAD (Computer Aided Design)
- Premium-quality solid uPVC extrusion
- All trim lengths, corners and joints precisely colour-matched
- All trims pre-fitted with waterproof sealant foam strip
- Perfect for FlexiProof Fleece Backed EPDM membranes
- Full range of CAD designed corner and joiner components for a perfect fit
- Manufactured in an ISO 9001 registered facility
- Fully recyclable

### Fast & Safe Installation

- All lengths of trims are pre-drilled at the correct spacing for fast and accurate Polytop fixing (stainless steel fixings with colour-matched Polytops also provided)
- Internal/external corner and joiner components CAD designed to fit snugly into place for a watertight seal
- All components quickly and easily glued into place

### Long Term Success

- Fully weatherproof
- Long-lasting performance
- Seamless finish

Rely on it.

#### RENOLIT EXOFOL COATING

All lengths of Integra Trim Solid are coated with RENOLIT EXOFOL high-performance film for a smart finish and exceptional weather protection.

Compliments every building and flat roof

Integra Trim Solid is available in:

RAL 9005  
Jet Black

RAL 7016  
Anthracite Grey

# Raised Kerb Trim

The complete Integra Trim Solid system is designed to meet high-end project requirements and budgets.

Choose the right trim lengths and components for the roof, follow the installation steps carefully and you'll finish every project beautifully, now and in the future.

## Raised Kerb Trim Lengths

Integra Trim Raised Kerb Trim is easily installed, looks great and delivers an effective water check upstand along flat roof perimeters - no need to fit a timber upstand!

Fitted with a high quality foam strip along the underside edge to create a solid, watertight compression seal with FlexiProof Fleece Backed EPDM roof membranes.

- Provides a 20mm water check upstand along the roof perimeter
- 10mm x 15mm foam compression strip creates a watertight seal with FlexiProof Fleece Backed EPDM membranes, even over seams and joints
- Available in convenient 2.5m lengths
- Smart matt/semi-gloss finish

**Length Dimensions**  
2.5m (L) x 100mm (D)

## Raised Kerb Trim Internal & External Corners

High quality uPVC external corners easily fit onto Raised Kerb Trim to deliver a seamless finish and long-lasting protection.

Easily join two lengths of Raised Kerb Trim wherever they meet on an external right angle.

- Designed and manufactured to snugly fit onto Raised Kerb Trim
- Quickly glues into place
- Low profile, seamless finish

**Internal Corner Dimensions**  
20mm (W) x 100mm (D)

**External Corner Dimensions**  
57mm (W) x 100mm (D)

## Raised Kerb Trim Joiners

High quality uPVC external joiner components easily fit onto Raised Kerb Trim to deliver a seamless join with long-lasting protection.

- Designed and manufactured to snugly fit onto, and effectively join, lengths of Raised Kerb Trim
- Quickly glues into place
- Low profile, seamless finish

**Dimensions**  
40mm (W) x 100mm (D)

### Colours to compliment every building & roof

Integra Trim Solid - Raised Kerb Trim lengths, corners and joiners are available in:

**RAL 9005**  
Jet Black

**RAL 7016**  
Anthracite Grey

Above all, it's from FlexiProof

## Gutter Trim Lengths

Integra Trim Gutter Trim is fitted to the timber batten on the roof fascia via its back plate. Its front plate, with compression seal foam strip, creates a watertight seal with FlexiProof Fleece Backed EPDM membranes (even over seams and joints). Easy to install and creates an effective gutter drip edge, every time!

- 10mm thick back plate provides a perfect surface to adhere FlexiProof Fleece Backed EPDM membranes onto
- Sloping edge on back plate ensures easy front plate alignment
- Available in convenient 2.5m lengths
- Smart matt/semi-gloss finish

**Length Dimensions**  
2.5m (L) x 100mm (D)

## Gutter Trim Internal & External Corners

High quality uPVC internal & external corner components easily fit onto Gutter Trim to deliver a seamless finish and long-lasting protection.

Easily join two lengths of Gutter Trim wherever they meet on an internal or external right angle.

- Designed and manufactured to snugly fit onto Gutter Trim
- Quickly glues into place
- Low profile, seamless finish

**External Trim Dimensions**  
44mm (W) x 76mm (D)

**Internal Trim Dimensions**  
40mm (W) x 76mm (D)

## Gutter Trim Joiners

High quality uPVC external joiner components easily fit onto Gutter Trim to deliver a seamless join with long-lasting protection.

- Designed and manufactured to snugly fit onto, and effectively join, lengths of Gutter Trim
- Quickly glues into place
- Low profile, seamless finish

**Joiner Dimensions**  
40mm (W) x 76mm (D)

Colours to compliment every building & roof

Integra Trim Solid - Gutter Trim lengths, corners and joiners are available in:

**RAL 9005**  
Jet Black

**RAL 7016**  
Anthracite Grey

All FlexiProof corner and joiner components are CAD (Computer Aided Design) designed to perfectly fit onto Integra Trim lengths.

Follow the installation steps carefully and you'll create a long-lasting watertight seal every time!
