SILVERSEEL

SilverSeel is the proven & permanent GRP (glass reinforced plastic) roofing solution that will outperform all other flat roof coverings.

- **Seamless** - No weak joints or welds
- **Fully bonded** - Liquid applied to roof deck
- **Super tough resin** - Reinforced with glassfibre matting
- **20 year material guarantee**
- **Contains FIRELOK®** - Conforming to rating - BS476 pt3 FAB

SilverSeel contains advanced FIRELOK additives and is tested and approved to the specification of BS476 pt3 FAB to meet building control requirements for fire safety where required.

SilverSeel Topcoat will resist damage from UV rays, keeping your roof looking great for years and years.

SilverSeel is issued with its own 20 year material guarantee directly from the manufacturer, along with a workmanship guarantee from the installer, your roof will be free from any leakages for at least 20 years.

SILVERSEEL ROOFING SYSTEM

SilverSeel Roofing System can be applied to any flat roof, any size, any configuration and can be installed without expensive specialist tools. The completed monolithic (seamless) membrane is extremely hard wearing, resisting UV, heat, weathering and foot traffic, ideal for balconies or walkways.

The SilverSeel system has been tested and approved to the specification of fire resistance (BS476 pt3 FAB) to meet all building control requirements for flat roofing.

In addition, a slate granule can be added to create a natural non slip finish. All SilverSeel products carry a materials guarantee, so you will be covered for anything nature can throw at your roof for 20 years.
