**Appearance:** The Camphor Hydrosol should be a clear transparent liquid with no visible impurities.

**Odor:** The Camphor Hydrosol has a Fresh, penetrating, powerful camphoraceous and mild cinedic aroma which is characteristic of Cinnamomum camphora.

**pH:** The pH of the Camphor Hydrosol should be within the range of 4.5 - 6.5.

**Solubility:** The Camphor Hydrosol is soluble in water, indicating that it can be easily formulated into various cosmetic and personal care products.

**Specific Gravity:** The specific gravity of the Camphor Hydrosol is 1.030, which is within the acceptable range for hydrosols.

**Refractive Index:** The refractive index of the Camphor Hydrosol is 1.345, which is within the acceptable range for hydrosols.

**Heavy Metals:** The Camphor Hydrosol contains less than 0.1 ppm of heavy metals, which is within the Acceptable limit for cosmetic ingredients.

**Microbial Test:** The Camphor Hydrosol conforms to the microbial limits specified, indicating that it is safe for cosmetic and personal care applications.

**Camphor:** Major active component, provides characteristic aroma and medicinal properties.

**Terpinen:** Contributes to the antimicrobial properties of the hydrosol..
