Stay charged when home or away with our Matrix+ 3-in-1 Charging Dock and its detachable 5,000mAh Power Bank and USB-C Apple Watch Charger.

The 5,000mAh MagSafe-compatible Power Bank can fully recharge your phone wherever you are, then slots into your 3-in-1 Dock at home to recharge alongside your phone, wireless earbuds and Apple Watch. Once slotted in, you can even use the Power Bank to power the entire stand for truly wireless triple-device charging.

## Power Bank Recharges Wirelessly

The detachable Matrix Power Bank recharges wirelessly in the Charging Dock at the same time as your phone, ensuring you won't forget to charge it. When you're out and about and catch your phone running low, the Power Bank can recharge it from 0-100% with its 5,000mAh battery.

## Portrait or Landscape

The 3-in-1 Charging Dock can charge your phone in portrait or landscape, perfect for watching recipes while you cook, or monitoring your notifications while you're working.

## Detachable Apple Watch Charger

When you need to keep your Apple Watch charged away from home, simply detach the USB-C Apple Watch Charger and take it with you. Less than 5cm long, you can plug it into your laptop, Matrix Power Bank or even phone's USB-C port to charge.
