VECTOR ARTWORK

WHAT IS VECTOR ARTWORK?

Vector artwork is art that's made up of vector graphics. These graphics are points, lines, curves and shapes that are based on mathematical formulas. When you scale a vector image file, it isn't low resolution and there's no loss of quality, so it can be sized to however large or small you need it to be. It's an excellent tool for putting company logos on business cards, creating poster designs, and when photo-shopping in Adobe Photoshop. Any art made with vector illustration software like Adobe Illustrator is considered vector art.

In comparison, raster art (also referred to as bitmaps or raster images) is created using colored pixels. When you enlarge a raster file with pixel-based art too much, the edges look jagged and the quality is lost. The resolution independence vector art displays allows it to be used in a variety of forms, from small illustrations to massive billboards.

QUALIFIED VECTOR ARTWORK:

- .AI (Adobe Illustrator)
- .CDR (Corel Draw)
- .EPS (encapsulated postscript)
- .PDF (portable document format)
- .SVG (scalable vector graphics)

- Typefaces (fonts) in artwork must be converted to outlines.
- A \$50.00 fee will be applied to the first order if artwork is not a proper vector file in one of the formats listed above.

RASTER IMAGE NON-VECTOR ARTWORK:

- .PSD (Adobe Photoshop document)
- .BMP (bitmap image)
- .GIF (graphics interchange format)
- .JPG/JPEG (Joint Photographic Experts Group)
- .PNG (portable network graphic)
- .TIFF (tag image file format)
- .DST (Data Storage Technology)
- .JEF (Janome embroidery format)
- .DOC (Microsoft document)
- .PPT (Microsoft PowerPoint)
- .PUB (Microsoft Publisher)
- .XLS (Microsoft Excel worksheet)
