### **STAINLESS STEEL CASE WORK** From Concept To Completion

### 1 Plan

Acart's experienced team of engineers can help conceptualize and plan a solution for your casework needs. Whether those needs are simply one cabinet or a complex build-out, we pride ourselves on helping you find a solution that works best for your facility. We will start with a proof of concept, and will revise your drawings until they meet your requirements.

### **2** Build

Once the engineering drawings have been finalized and approved, your casework project starts to come to life. After your project has been built, Acart makes sure your product passes rigourous quality and standards check list prior to shipment.

When your casework arrives at its destination, Acart ensures installation happens smoothly and timely. We communicate with the contractors/installers to ensure your product is installed according to your specifications. In short, Acart stays involved from concept to completion.

Acart's full line of stainless steel Wall Cabinets, Base Cabinets, and High Cabinets can be configured in a number of ways to create the arrangement your facility needs. Choose from solid doors, glass doors, sliding doors, or no doors. Many optional features are available including cam locks, tee handles, electronic keypad door lock, and sloping tops, to name a few.

### STANDARD FEATURES

- Magnetic door catches with a quiet close
- Seamless front face on all cabinets
- Revit files & spec sheets available
- Fully welded construction
- Type 300 series stainless steel
- Stainless steel shelves (where applicable shelves adjust in 1-1/2" increments)
- 4" standard pull handle (excludes sliding doors)
- 3/16" tempered glass (where applicable)
- Adjustable feet on Base Cabinets & High Cabinets

Thickness

### **Counter Tops**

Counter tops are fabricated from 16 gauge (.060") 300 series stainless steel. The underside is reinforced with channels and coated with sound deadening mastic, sink included. Marine edges are provided for counter tops containing sinks. Sinks are fabricated (not drawn) from 16 gauge (.06") 300 series stainless steel with a 5/8" cove corner, laser etched gallon markings, positive pitch towards drain, and are integrally welded to top. A 4" backsplash is standard with optional side splashes. Please consult Acart for custom sizes meeting any and all architectural requirements. Counter tops are fabricated in one piece where design and materials permit.

Note: All counter tops are sold separately and installed by others along with any plumbing fixtures

### **Sloping Tops**
