

# Curiosity 45 - Black/Brown

Davide Oppizzi

## DESCRIPTION

Curiosity is a portable lamp whose shape reveals its natural vocation for showcasing, but at the same time for relations. It highlights the spaces where people are gathered or the objects accommodated within its frame.

Curiosity is a frame for displaying objects with the chosen item arranged on the base and illuminated by the small spotlight at the top, available with two different light beam angles. In the Curiosity 36 Sphere version, the addition of a glass globe creates a soft, diffused light.
