User Manual

Part 1: Function Overview

The Wax Therapy Appliance is widely used in beauty salons and at home for its excellent skin-care benefits and ease of operation.

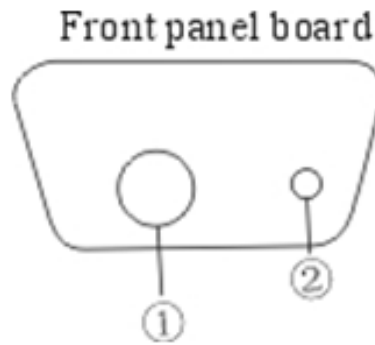

Key Benefits:

- Especially effective for dry, aging, or wrinkled skin (ideal in autumn/winter).
- Enriched with elements such as vitamins and hydrolyzed collagen.
- Reduces wrinkles, brightens skin tone, and improves smoothness.
- Stimulates sweat gland activity to promote detoxification.
- Softens and moisturizes skin, leaving it tender and healthy.
- Enhances blood circulation, reduces minor wrinkles, and restores elasticity.
- Suitable for treatments on face, hands, feet, and whole body.

Part 2: Panel Overview

Front Panel

1. Temperature Adjustment Knob
2. Indicator Light

Part 3: Method of Use

1. Insert one end of the power cord into the socket (220V/110V AC), and plug the other end into a power outlet.
2. Rotate the temperature knob clockwise. The indicator light will turn red, showing that the unit is heating.
3. Once the wax is melted, rotate the knob back to the middle position. The wax will maintain a constant temperature of $55^{\circ}\text{C} \pm 1^{\circ}\text{C}$.
4. The appliance automatically maintains the temperature within the safe range.

Part 4: Safety Precautions

1. Always test wax temperature on the wrist before application to avoid burns.
2. Do not use on damaged or acne-affected skin.
3. Do not use on inflamed or infected areas.
4. Switch off the appliance after each use. Re-plug only after wax is fully solidified.
5. Do not pour unmelted wax directly into the pot. Only add melted wax.
6. Wax depth in the pot should not exceed half of the container height.

Part 5: Professional Use Instructions

Face Treatment (Professional Face Nurse)

1. Wash and analyze the skin.
2. Apply massage lotion and steam the face for about 5 minutes, then remove the lotion.
3. Apply wax mask over the lotion if temperature is safe.
4. Remove after 15–20 minutes.

Hand Treatment (Professional Hand Nurse)

1. Wash hands and remove any jewelry. Test wax temperature first.
2. Dip hands into wax for 2–3 seconds, then remove.
3. Repeat 4–6 times until a thick wax layer forms.
4. Wrap hands in gloves to retain heat.
5. After 15–20 minutes, remove gloves and peel off wax. Hands will be soft and smooth.

Foot Treatment (Professional Foot Nurse)

1. Wash feet and test wax temperature.
2. Soak feet in wax for 2–3 seconds, or apply with a brush if direct dipping is not possible.
3. Repeat 4–6 times until a thick wax layer forms.
4. Wrap feet in a plastic bag or cover to retain heat.
5. After 15–20 minutes, remove cover and peel off wax. Feet will be smooth and springy.

Part 6: Technical Specifications

- Working Voltage: 220V AC / 110V AC
- Maximum Power: 300W
- Frequency: 50Hz / 60Hz

Attention

- This appliance has been strictly tested and inspected before sale.
- Repairs must only be carried out by authorized service centers.
- Do not attempt to open or repair the machine yourself.
- For professional use only.

Dimensions:

- 9.3"L x 8.7"W x 7.5"H
