

**Hurlingham Bath's don't just offer painted baths, there is a huge range of different finishes available to create your one of a kind bespoke bathtub, perfect for your Brand New Bathroom.**

**The variety of finishes are as follows:**

**PAINTED:** From a choice of over 10,000 colours, Hurlingham offer a custom paint finish on most baths. They can replicate any paint hue including the whole Farrow and Ball range, and even have a full selection of liquid metal paint finishes.

If you have a “more unusual” selection, all we need is a physical sample to send Hurlingham and they can transform your bath into your dreams in a matter of days

**LEATHER:** You can choose from a selection of rich high quality leathers and a number of warm finishes, either creating a full surround or just a luxurious rim.

To find out about the exact process of what is included in fitting the leather, then please contact us for more information.

**FABRIC:** If you have a fabric that you want to apply to the bath, this can be sent to Hurlingham for prior approval. A swatch of the material is taken to ensure it is of a high enough quality before any fitting or water proofing process is started. For more information on the process, please contact us.

**HAND GILDED:** This is the most unique and opulent finish offered by Hurlingham. From a selection of faux gold, copper, pewter and bronze leaf, you can create the most lavish and bespoke bathtub of your imagination. This is a highly skilled process and you will be given the opportunity to speak to a gilder prior to commencement to discuss your design objectives

The full range of optional finishes is listed below. To discuss pricing on any of the options given, please contact us prior to completing the purchase of your bathtub.
