4. First-aid measures

Description of necessary measures, subdivided according to the different routes of exposure, i.e., inhalation, skin and eye contact, and ingestion:

Eye Contact:	Flush eyes with plenty of water for at least 20 minutes retracting eyelids often. Tilt the head to prevent chemical from transferring to the uncontaminated eye. Get immediate medical attention.
Skin Contact:	Wash with soap and water. Remove contaminated clothing and launder. Get medical attention if irritation develops or persists.
Inhalation:	Remove to fresh air. If breathing is difficult, have a trained individual administer oxygen. If not breathing, give artificial respiration and have a trained individual administer oxygen. Get medical attention immediately
Ingestion:	Do not induce vomiting and seek medical attention immediately. Drink two glasses of water or milk to dilute. Provide medical care provider with this MSDS.

5. Fire-fighting measures

Suitable (and unsuitable) extinguishing media:

Suitable extinguishing media:	Use alcohol resistant foam, carbon dioxide, dry chemical, or water spray when fighting fires. Water or foam may cause frothing if liquid is burning but it still may be a useful extinguishing agent if carefully applied to the fire. Do not direct a water stream directly into the hot burning liquid.		
Unsuitable extinguishing media:	No Data Available		
Specific hazards arising from the chemical (e.g., nature of any hazardous combustion products):			
Flammability Summary:	Combustible		
Fire and/or Explosion Hazards:	Vapors may be ignited by sparks, flames or other sources of ignition if material is above the flash point giving rise to a fire (Class B). Vapors are heavier than air and may travel to a source of ignition and flash back. Combustible Liquid. Can form explosive mixtures at temperatures at or above the flash point. Empty containers retain product residue (liquid and/or vapor).		

MIDNIGHT POMEGRANATE

	Vapor can ignite potentially causing an explosion.
Hazardous Combustion	Carbon Oxides, Carbon dioxide, Carbon monoxide, Toxic fumes.,
Products:	Toxic gases
Special protective equipment	Do not enter fire area without proper protection including self-
and precautions for fire-	contained breathing apparatus and full protective equipment. Fight
fighters:	fire from a safe distance and a protected location due to the
	potential of hazardous vapors and decomposition products.
	Explosive vapor could form.
	Use methods for the surrounding fire.

6. Accidental release measures

Personal precautions,	No health affects expected from the clean-up of this material if
protective equipment, and	contact can be avoided. Follow personal protective equipment
emergency procedures:	recommendations found in Section VIII of this MSDS
Methods and materials for	No special spill clean-up considerations. Collect and discard in
containment and cleaning up:	regular trash.

7. Handling and storage

Precautions for safe handling:	Mildly irritating material. Avoid unnecessary exposure. Do not get in eyes, on skin and clothing Use with adequate ventilation "Empty" containers retain product residue (liquid and/or vapor) and can be dangerous. Follow all MSDS/label precautions even after container is emptied because it may retain product residues Wash thoroughly after handling As with all chemicals, good industrial hygiene practices should be followed when handling this material. Avoid contact with material, avoid breathing dusts or fumes, use only in a well ventilated area. Use spark-proof tools and explosion-proof equipment Ground and bond containers when transferring material	
Conditions for safe storage, including any incompatibilities		

Conditions for safe storage:Store in a cool dry place. Isolate from incompatible materials. Limit
quantity of material stored. Store in a cool dry place Keep away
