COLLECTION 2024

DUAL COLOUR

COLLECTION

C O U
C O U
C O U

The Dual-Colour Collection is the latest work from our designers. Combining modern and traditional aesthetics, and putting practical and fine arts in one, this series demonstrates minimalist lines and exquisite colour, bringing natural elegance to the table. The base colour of the collection is black, and it comes in five matching colours; Brown, Beige, Grey, White and Black.

PERFORMANCE | COMMERCIAL GRADE MELAMINE

What is Melamine?

Melamine, which begins in a powdered form, is an organic nitrogen-rich compound used for manufacturing a wide array of items including utensils, bowls, plates, serving trays, and drinkware. Melamine is a hard plastic that is heated, molded, and cured with strengthening compounds. The finished product becomes an extremely durable product ideal for a variety of useful applications.

Is Melamine Safe?

COUCOU melamine items are all BPA-free, our products have passed TUV SUD product certification and backed with a two-year warranty. Our TUV SUD test reports of Safety and Risk assessment of melamine states that the chemicals used in the production process will not migrate, or transfer, into food if it is not heated above 90 degrees Celsius. Melamine is known for its low acute toxicity and is not classifiable according to its carcinogenicity in humans. The food-safe anti-bacterial properties of melamine make it an easy-to-clean alternative to traditional serve ware.

How Durable is Melamine?

Our 100% premium heavyweight melamine is scratch and chip-resistant to withstand heavy abuse over time. The melamine resin, after being heated and cured with strengthening compounds, becomes a shatterproof substance perfect for indoor and outdoor dining. The reusability of melamine products creates a substantially lower impact on the environment when compared to single use dinnerware. Due to decreased breakage, many restaurateurs enjoy the benefits of lower overhead costs associated with shrinkage. Although melamine is extraordinarily sturdy, it should never encounter serrated knives, harsh abrasive cleaners like chlorine bleach, or metal scouring pads to protect the surface.

Is Melamine Tolerant to Heat and Cold?

Melamine should never be used in a conventional oven, microwave oven or placed under a heat lamp for extended periods of time as it is an insulator, not a conductor, of hot and cold temperatures. The chemical properties of melamine allow temperatures as cold as -5 degrees Celsius and as hot as 90 degrees Celsius without breakage. Melamine's insulating qualities make it ideal for cold food buffets, salad bars and deli display cases. Our premium melamine products are commercial dishwasher safe and come with specific care and use instructions to provide optimal cleaning results.

PERFORMANCE | COMMERCIAL GRADE MELAMINE

Retail vs. Commercial Grade Melamine

What are some of the key differences between retail and commercial-grade melamine products? It is common for food service operators to explore this question when stocking for their business. Just like traditional dinnerware, there are degrees of quality that may justify your investment requirement.

Melamine qualities vary depending on where it is purchased, the manufacturing process, material thickness, design features, and intended use. Retail-grade melamine is known for its low price point, thinner material and smaller quantities. Retail melamine has low requirements for safety when compared to commercial-grade options. The melamine available from retailers is meant for light-duty use and will not stand up to the abuse of everyday use.

Alternatively, commercial-grade melamine is extremely sustainable and made to withstand heavy use and commercial dishwashers. The design features are centered around durability and high safety standards. Commercial melamine is usually thicker and sturdier than retail-grade melamine and is consistent throughout every piece. Higher safety standards include FDA-approved materials, factory audits, product testing, and bacteria-free surfaces.

The availability of retail melamine is typically low and inconsistent, whereas commercial products are stocked for many years and the options remain consistent. Retail sales rely on one-time sales while commercial sales rely on large reorders of products. Due to these larger runs of production, the colors of commercial pieces usually remain available for long periods of time.

When choosing the right product to accommodate your needs, take these general practices into account. Remember that not every melamine piece is created equal and high quality comes with a higher price tag. If you're purchasing melamine for a commercial environment, make sure to purchase commercial-grade product to protect your investment.

MELAMINE USE & CARE

- Melamine is not to be used in the microwave or oven.
- For best results, use only non-abrasive plastic pads or a plastic-type bristle to clean or remove dried food.
- Harsh or abrasive cleaners, steel wool or metal scouring pads are not recommended for melamine products.
- Melamine is commercial dishwasher safe. However, on low temp dishwashers, avoid excessive use of chlorine over 100ppm, or bleach.
- Please consult your chemical specialist for the best solution made specifically for use on melamine and other plastic products.
- Pre-soak melamine products, if necessary, in a high quality pre-soak dishwashing detergent.
- Serrated knives will damage products over time.

About INMIRON AUSTRALIA

With over 25 years of experience, Inmiron is an international company specializing in the manufacture, customization, wholesale and retail of professional melamine tableware. Products from Inmiron are made from 100% Food-grade material. We possess ISO 9001 Quality Management Certificate and our products have passed TUV-SUD product Certification.

Our product collections cover supplies to the hotel, restaurant, café, aged care, child care and catering industries. We cooperate with many well-know companies such **guzzini** as **ITALY** and **Zara Home**, With our high-quality products and professional service, we sell our products all over the world and our product's are particularly popular in Europe.

Inmiron is committed to providing a diverse range of services to our customers and have introduced both standardised and personal customization service in Australia. At Inmiron we can produce to customer's designs or customise logos on our products for customers.

Please refer to Inmiron AU official website for more details about our customised service policy: www.inmiron.com.au
