QUEEN OF HEARTS™

DESIGNED WITH
SUSAN WINGROVE,
BS, RDH

For every Queen of Hearts purchased, PDT will make a donation to the **American Heart Association**

Dental **PRODUCT SHOPPER**

BEST
PRODUCT

The 6mm cutting edge slides easily into deep pockets when you lead with the toe like a probe, and then make a vertical stroke.

Unique shape and longer blade offer increased access over shorter gracey and universal curette blades

Balanced and rotated blade so the toe can be inserted into a deep, narrow pocket, minimizing tissue trauma

Designed to allow for comfortable universal access, adapting to furcations and irregular root surfaces

“Finish with the Queen of Hearts using vertical, oblique and horizontal strokes to smooth and remove the calculus in the deepest pockets and furcation areas of the affected teeth. Add this new essential curette with one of the longest cutting edges on the market to reach and smooth the roots of periodontal diseased teeth.

-Susan Wingrove, BS, RDH
