

## General Description

Prochem HDX is a specially formulated emulsion hardener remover. This product will break the chemical bond on a post-hardened emulsion. Once the chemical bond is broken, the emulsion can be removed using the normal procedure with any of CCI's effective emulsion removers. HDX improves the speed and efficiency of the reclaim procedure on difficult post-hardened screens.

## Advantages

- Ideal for water-base and discharge printing
- Works on all post-hardened screens
- Increases reclaim speed
- Non-Hazardous
- Low Odor
- Non-Flammable
- Mesh Safe

### **Quick Tip:**

**Always pressure wash screen from the bottom and work upwards.**

## Application

1. Spray HDX on both sides of a dry screen.

2. Scrub screen with non-abrasive pad or brush. Allow to dwell for 1-3 minutes.

3. High pressure rinse - starting at bottom.

## **Available in:**

**1 quart**

**1 gallon**

**5 gallon pail**

**55 gallon drum**
