

General Description

Prochem HardenX is a one part chemical hardener designed to increase the water resistance of photo-emulsions. HardenX increases the print durability and reduces premature stencil breakdown. It is excellent for high humidity conditions. With some emulsions, HardenX may produce a waterproof stencil that is difficult to reclaim.

Advantages

- Ideal for water-base and discharge printing
- Increases production
- Increases water-resistance
- Reduces emulsion "break-down"
- Non-Hazardous
- Water-Based
- Low Odor
- No VOC (Volatile Organic Compound)
- Mesh Safe

Quick Tip:

For Best Results:

Allow HardenX to dwell on the screen for 12 to 24 hours. The reaction will continue to harden the emulsion after it has dried on the screen.

Application

1. Apply HardenX on both sides of dry screen.

2. Scrub screen with non-abrasive pad, brush or towel.

3. Allow HardenX to dwell on the screen until it has completely dried.
