

TechMount® Dry Mount Tissue

Techmount® is a breathable, porous dry mount tissue created for dry mounting RC photographs and most paper based prints. It produces a smooth permanent bond activating at low temperatures. TechMount® is a tissue based material coated on both sides with a heat activated adhesive that bonds as it heats. The bond becomes permanent when cool.

SPECIFICATION

Construction	Porous Breathable pH neutral base paper.
Adhesive	pH neutral adhesive 7.0 with a permanent bond
Processing Temperature	85 – 95C The temperature may vary according to the substrate and equipment used.
Recommended temperatures and dwell times should be used as a guideline. The best combination could vary depending upon equipment, substrate, size and humidity.	Dwell Time - Mechanical Press 1.5 - 2mins Vacuum Press 2 - 3mins

HEALTH & SAFETY

When used for the purpose intended this product presents no known hazard
