

## **BufferMount® (Acid Free)**

BufferMount® is an acid free tissue coated on both sides with a low temperature acid-free adhesive. An added buffering agent helps neutralize environmental degradation. The adhesive melts during the heating process, bonds as it cools, and is removable when reheated. BufferMount® is recommended for bonding high quality or delicate art work such as photographs, silks, rice papers, posters and inkjet prints.

### **SPECIFICATION**

Construction	Acid-free, buffered pH neutral base paper.
Adhesive	Ph neutral multiplex formula 7.0
Processing Temperature	75 – 90C The temperature may vary according to the substrate and equipment used.
Bond	Heat Removable

### **HEALTH & SAFETY**

When used for the purpose intended this product presents no known hazard

### **WARRANTY**

All data pertaining to this product has been compiled from research and is believed to be correct however it is for guidance only. It is recommended that the purchaser independently determines that the product is suitable for purpose.
