

A CLEARER VISION FOR THE PERFECT FINISH

DF 350

Digital Foiling Machine

The DF-350 is a hand-fed desktop digital foiling machine which combines simplicity of use with quality of performance in applying a decorative foil to a range of digitally produced print, an ideal solution for today's short-run on-demand requirements.

Good sized feed and exit tables are supplied but they may be easily removed (without tools) to reduce the space required for storage.

The DF-350 has two levels of heating along with variable temperatures up to 140°C.

A reverse mode may be selected if required.

Both unwind and rewind units may be tensioned independently.

Technical Specification

Maximum working width	350mm
Maximum Stock thickness	400gsm
Power	1400W
Maximum Temperature	140°C
Maximum Speed	3m/minute
Core Size	25mm (75mm optional)
Pressure Setting	Mechanical
