

Fusion 4000® (Acid Free)

Fusion 4000® is a thermal-activated 100% acid-free adhesive film. The adhesive melts during the heating process, bonds as it cools, and is removable when reheated. It can be patched, overlapped and pieced together because it flows under heat and pressure. Fusion 4000® is also self-trimming and is ideal for mounting lithographs, newsprint, photographs, inkjet media, vellum engravings, silks, canvas, foils and much more.

SPECIFICATION
