

# iCoin™ CP900

## Standard features include:

- Ready to accept any or all Canadian \$2, \$1, and quarters - no programming required. Preprogrammed coins provide for better acceptance of valid coins and rejection of unwanted coins.
- Up to 3 tokens of your choice are easily programmed in addition to preprogrammed coins.
- Superior solid state sensor technology provides consistent and accurate coin evaluation.
- Waterproof design for high moisture environments such as car washes.
- Constructed with stainless steel and high impact plastic.
- Anti-stringing sensors and logic are standard equipment and reject all attempts at improper use.
- Changes to currency coins can be updated in the field without removing the acceptor from operation.
- No sample coins or manual adjustments are required.
- Universal interface works with most timers.
- Industry standard faceplate 2" x 7 3/4" for easy retrofitting.
- Standard unit operates on 24 vac. Relay output and 12 vdc versions are also available.

## ELECTRONIC COIN ACCEPTOR
