

How to make Slime

You need:

- White PVA glue
- Water
- Food colouring
- Borax

Method:

- Mix 1 tablespoon of white PVA glue, one tablespoon of water, and one drop of food colouring into a container.
- In a second container dissolve one teaspoon of Borax into one tablespoon of warm water.
- Mix the glue and borax mixture together.
- The slime should form instantly. Lift it out of container and throw out the left over liquid.
