STEEL FRAME STUD PUNCH

- Steel framing is commonly used internally on commercial builds.
- Will punch holes into the steel stud without the need for predrilling.
- An essential tool when installing tubing or cable through steel frame.
- Create two different size holes – 22.2mm and 34.1mm.
- Can punch up to 1mm thick steel.

Purchase Grommets (STP710GM) to go with your Stud Punch to protect tubing or cable from steel edges and prevent vibration and movement.

Stud Punch comes with:

- 22.2mm punch and die
- 34.1mm punch and die
- Heavy duty plastic moulded case

plumBOSS bi-metal hole saws feature a built-in arbor and include a pilot drill fitted to each one – ready to use straight from the box.

Our hole saws have been tested to outperform other leading brands from the USA.

- The solid plate steel backing disc and built-in arbor make them stronger and smoother to use and allow for drilling into pipe where not all teeth can engage at the same time.
- Comprehensive size range and kits available.
- Drill holes in 45mm thick stud in one pass.
- Suitable for wood, plastic and steel pipe (when used with lubricant).
