WASTE DISPOSAL POLICY

Summary

As a company committed to reducing our environmental impact we use the following priorities to assess our waste strategy.

1. Reduce usage
2. Recycle (in house)
3. Energy Reclamation from waste (in house)
4. Recycle (external contractor)
5. Energy Reclamation from waste (external contractor)
6. Landfill

We review our overall waste management strategy twice a year, and we have quarterly “Reduce & Recycle Reviews” to see where improvements can be made within the business.

Waste Streams

| Material | Disposal Method |
|--------------------------------|----------------------------------|
| Bronze and Brass scrap | Recycle in house |
| Silver and Aluminium scrap | Recycle with external contractor |
| General waste inc. used PPE | Energy reclamation or recycled |
| Non-hazardous industrial waste | Energy reclamation |
| Hazardous industrial waste | Chemical disposal contractor |
| Cardboard / paper | Recycled |

Approved Contractors

We assess each contractor using the following priorities.

1. ESG policies
2. Travel distance to waste processing site
3. Service record
4. Pricing and availability
