

Dynamic-2TB-L

[DT-DYN-2TB-L]

On wall projector screen with 2-way motorised top and bottom masking for visible screen width greater than 420cm up to 570cm

DT SCREENS

DYNAMIC-2TB-L [DT-DYN-2TB-L]

On wall projector screen with 2-way motorised top and bottom masking for visible screen width greater than 420cm up to 570cm

The DT Dynamic-2TB-L is an on wall projector screen optimised for large sizes, featuring 2-way motorised side masking and Mask Position Logic based control.

PRODUCT HIGHLIGHTS:

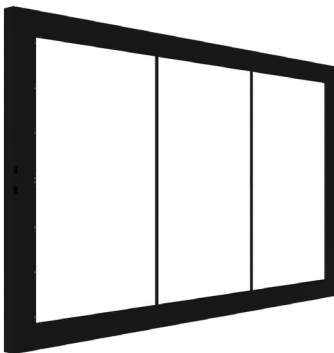

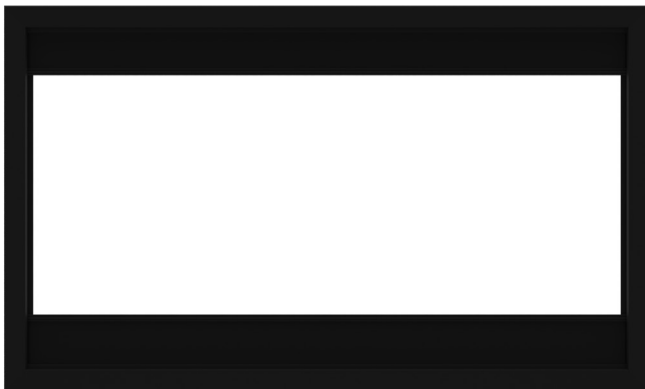

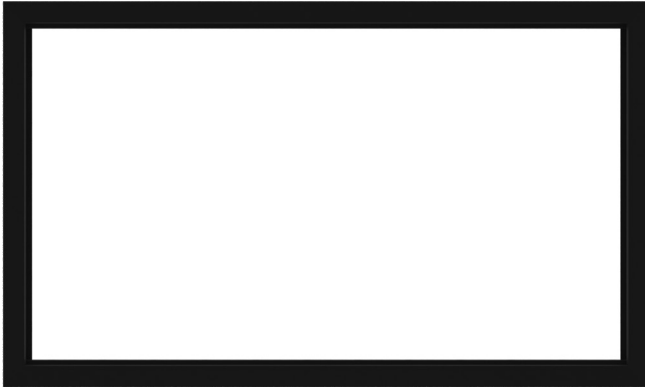

- Motorised Variable Width Masking - 1.78 to 2.70:1
- Sizes 420cm - 570cm wide
- Mask Position Logic - Preset free mask position selection
- RS232 and IP control as standard
- SES image surface fitting - Toolless front fitting screen surface
- Whispertec quiet motors

Dynamic-2TB-L

[DT-DYN-2TB-L]

On wall projector screen with 2-way motorised top and bottom masking for visible screen width greater than 420cm up to 570cm

The Dynamic-2TB-L supports 2-way motorised side masking allowing perfect framing of aspect ratios in the range 1.78 to 2.70:1. This variable width and constant height masking maximises the impact of movie content.

The Mask Position Logic (MPL) system is a proprietary development of DT Screens and enables the Dynamic-2TB-L to calculate the exact location that the masks should be positioned to create any requested aspect ratio in the supported range. With MPL, setting mask presets is no longer required.

The Silicon Edge Surface technology (SES) enables the screen surface to be fitted without any need for tools and from the front of the screen. The screen surface is factory CNC cut for exact fitting; thus ensuring uniform tension. SES enables the screen surface is removable for access and maintenance behind.

TECHNICAL SPECIFICATION:

- Overall size =

Width = Viewable Screen width + 458mm [18"]
Height = Viewable Screen height + 458mm [18"]
Max frame depth = 166mm [6.54"]
Wall Surface to image Surface = 60mm [2.36"]

- Available with our full range of Image Surfaces
