# Remote View Setup

To set up remote viewing, you need to install the Eseecloud App and register an account. This allows you to access live feeds from your security cameras from anywhere.

Install Eseecloud App

1 **Download**

Visit the App Store or Google Play Store to download the Eseecloud App on your smartphone or tablet.

2 **Installation**

After downloading, follow the on-screen instructions to complete the installation process.

3 **Login**

Once installed, create an account using your details.

Add camera

Add New Device

Add new device

After logging in, select the '+' sign or choose the 'Add camera' option.

Device Cloud ID

Enter the unique Cloud ID, which can be located in your NVR system under 'System Setting > Network' (Old UI) or 'System Setup > App/account' (New UI).

Please turn on nearby devices

The current application lacks relevant permissions and cannot search for nearby devices through Bluetooth

Cancel | Enable

Click "Cancel"

** Skip this step if you are an iPhone user.

Please turn on Bluetooth to automatically find nearby devices.

B Camera ID add
Enter device ID number Add

C LAN scan
Connect devices on the same network

There are three options for adding a new device

Scan to add, Camera ID add, LAN scan

A. Scan to Add

1 **QR Code**

Scan the QR code shown on your NVR screen, which can be found within your NVR system under 'System Setting > Network' (Old UI) or 'System Setup > App/account' (New UI).

2 **Fail to scan**

If scanning is not possible due to screen glare, please use another option to add your device.

C. Lan Scan

Access LAN Settings

**1**   Within the options, select 'LAN Scan' to search for your local device.

Device List

2   After scanning, a list of local devices will appear. Select the ones you wish to add.

Complete Setup

Final Review   1

Ensure that all your NVRs are correctly connected to your home router via Ethernet cable or Wi-Fi and are operating as expected.

2   Remote View

To begin remote monitoring of your cameras, just click the play button in your app.
