

LED Desk Lamp

Operating Voltage - DC Adaptor 12V

10W c⊕us F© (€

DIMENSION

Science Mode

This mode is helpful when studying mathematics and science, where concentration is required, thanks to it's effect in increasing the thinking speed of the brain. The high color temperature of the light is maintained(6,500K \sim 7,000K) with brightness.

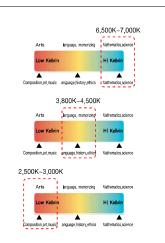

Memory Mode

This mode is helpful in learning subjects needing memorizing (Korean language, Korean history, ethics, etc.) which require high power of concentration for prolonged periods, while general color temperature is maintained $(3,800 \text{ K} \sim 4,500 \text{ K})$, giving a sense of stability.

Resting Mode

This mode is suited to the study of arts subjects requiring creativity by stimulating imagenation such as art music, ect. It is also suited to resting & relaxation including listening to music, while the comfortable color temperature is maintained(2,500K \sim 3,000K), giving a soft and stable sense.

■ TECHNICAL SPECIFICATIONS

Model	Mode	Color Temp (K)	Rated Input Voltage (V)	Power Consumption (W)	Illuminance (Lux)
Q-400	₩ Mode 1	6500 ~ 7000	DC Adaptor 12	10	1400
	Mode 2	3800 ~ 4500	DC Adaptor 12	9	1200
	Mode 3	2500 ~ 3000	DC Adaptor 12	8	800

• Operating Temperature : -20° C $\sim 40^{\circ}$ C • Housing : PC / ABS / Aluminium • Color : White&Black / Pink
