1-Year Warranty

No Magic? No problem. Our warranty has you covered for 12 months.

Ever wonder what makes the Magic Wand's vibrations feel so... magical? Here's the secret formula:

- **Powerful Motor**

Our high-capacity motor provides more powerful rotational force (high torque). Products with smaller motors may actually lose torque as they spin faster, leading to less powerful, more buzzy vibration.

- **Robust Mechanism**

To convert all that rotational force to deep, rumble vibrations, Magic Wand uses a carefully designed weight and spring system that transfers the power perfectly to the head of the wand.

- **Size and Shape**

The Magic Wand's iconic head shape and surface area make it easy to enjoy on just about any part of your body.

Put it all together and you've got the magic combination of direct, surface stimulation and indirect, penetrating vibrations that you can feel inside. This can lead to blended clitoral orgasms as well as perennial and prostate stimulation.
