

BRASS  MONKEY®

The King of Cold™

www.brassmonkey.co.uk

A new ice age has begun...

Introducing the next generation of ice baths that look as good as they make you feel. Using the latest cold water immersion technology, we created Brass Monkey to elevate your guest experience, helping you stay ahead of the curve.

We understand clients expect more. A more impressive and complete wellness offering. A more luxurious aesthetic. An ever-more refined service. With our innovative approach, from the ice-generating, patented technology we use in every product and the 700 design combinations available, to the versatile installation options, you'll exceed all expectations.

Help your clients build stronger minds and bodies through the power of the ice. Enhance your heat contrast therapy experience and enjoy the commercial benefits of your clients staying longer for the health benefits.

We've safely harnessed the power of the cold to increase cardiovascular strength, achieve better focus and mental alertness, a stronger immune system and improved metabolism.

The Brass Monkey experience

One of a kind

Our patented technology generates its own ice on a system you control and the dual filtration ensures the water is always fresh and clean. All with an unparalleled pro-grade design, built to last in a commercial setting from the highest quality materials.

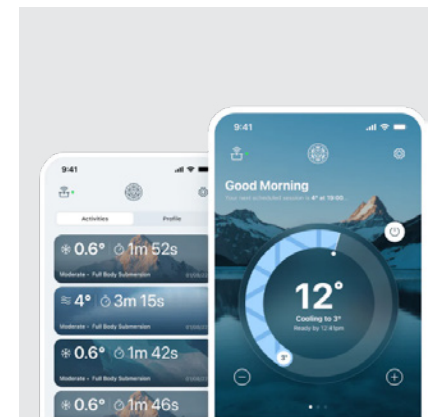

Delivering the exceptional

Enhancing your current wellness space with a Brass Monkey ice bath is a show of commitment to your guest experience. It's why we've partnered with exclusive hospitality clients to meet the ever-growing community of cold water immersion enthusiasts.

Beauty served ice cold

With over 700 colour and material combinations, three flexible choices of installation, and full customisation options available, we elevate your current set-up while working seamlessly with your existing aesthetic.

Supported service

When the installation is complete, we're there for you. With remote digital support management via our app and regular check-ins, we're on hand to ensure you have the help and guidance needed to continue your commitment to your guests.

Seamless solutions

Enhancing your current set-up can present its challenges. That's why we have three versatile installation options to ensure a seamless finish that looks and feels like it was always part of the plan.

Each option uses the same state-of-the-art technology, but how they are integrated varies on the product and the space we're working with. A full consultation on the best solution will happen early in the process so both sides of the partnership has full visibility of the end result.

We have three ways to integrate...

01. Headless

Your ice bath sits in your chosen space while the ice-generating technology and filtration system hub are connected but installed away from the bath.

02. Partitioned

A wall is built to divide the ice bath from the technology hub, separating the two visually, yet remaining fully physically connected, giving the appearance of a smaller unit for the view of the client.

03. Standalone

An individual ice bath with all components together, wrapped in your chosen finish.

Pro Ice Plunge

Our pro-grade models are ideal for high frequency use, suitable for spas, wellness hubs and larger fitness studios.

- Automated ice making with dual ice panels for increased ice creation
- Temperatures as low as 0°C
- Up to 60 users per day
- 316 Stainless steel interior
- UV and enhanced two stage filtration
- Three ways to integrate into your space
- Wi-fi enabled remote support
- Handmade to order in the UK
- 2-year limited warranty

Prices from £19,500 + VAT

Pro Plunge Duo

Made for two.

The Duo is built for a shared cold water immersion experience. Stepping into the ice can be a challenging and personal thing, so choosing the right person to experience it with can provide motivation and strengthen your resolve when you need it most. Perfect for wellness retreats and spas where guests come to share their practice.

The Duo is the big sister of the Pro Ice Plunge, sharing all its technical aspects, but coming in a bigger size.

Prices from £25,500 + VAT

Get the look you want

Brass Monkey supports you in creating your signature look. With 100s of finish options composed of millboard, natural wood, stainless steel and painted steel.

- **Natural wood** - cedar, thermo-wood in natural, chalked or dark finishes
- **Millboard** - a durable resin in a wood-effect finish in 8 colour-ways
- **Any colour RAL** or simple stainless sides
- **Custom logos and prints** available in hard-wearing vinyl

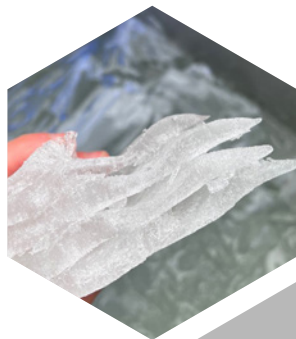

Why buy a Brass Monkey?

Brass Monkey exists to help your customers to develop a strong and resilient mind and body.

- Patented ice creation
- Energy efficient
- Easy to maintain
- Remote support and management

Made possible

We understand the importance of your aesthetic. With our vast array of material and colour combinations, as well as completely bespoke options available, we can help your vision come to life.

Our experienced design consultation service is there to ensure you get exactly what you want, the way you want it. If you prefer a plunge for one or a space for two, we can make it happen. Change the internal lighting? No problem. Choose the colours and the cladding, free-standing or sunken into the ground, naked or completely customised. Whatever you need, our experts are there to make it all possible.

The Brass Monkey team are happy to support you with your project.

Please email hello@Brassmonkey.co.uk to book a consultation.
