

PRM offers the VP Series Carbon Vessel where standard air flow volumes are required with minimal backpressure. These units include a false bottom and distributor screen to allow for more even distribution and lower pressure drops.

VP-2000:

64" Diameter x 72" Tall
2000 lbs 4 x 10 Carbon
8 inch Inlet/Outlet
Aluminum, Carbon Steel or Stainless Steel

- False bottom allows for even distribution, lower pressure drop, and no channeling
- Open top drum allows for easy carbon access and change-out
- Forklift Pockets for easy mobility
- Custom inlet and outlet connections available

Availability: Typical lead time is 2-4 weeks
