

## Skid Mounted Pump System with Control Panel

PRM offers a Skid Mounted Pump System with Control Panel configured for Batches. Manufacturers regularly need to pump batches of water from tank to tank. This skid allows the operator to set the counter to a desired amount and when the pump turns on it will pump that amount of gallons and automatically turn off.

### Standard 3 HP 100 GPM Pump Skid Specifications:

- Skid mounted pump package (AMT 490A-95 pump)
- NEMA 4/12 UL listed system Control Panel
- Pre-wired and plumbed with 2" inlet and outlet connection
- 2" Flow Totalizer Water Meter with Pulse Output to Control Panel
- Includes Sch 80 PVC True Union isolation valves
- Control Panel is configured for 120/230V 3 phase power input
- Power distribution block
- MOL protector and contactor
- Relays for counter
- Adjustable control counter
- HOA switch/status light
- Pushbutton to reset counter and restart cycle
