

Rotameters for Water Applications

www.prmfiltration.com

Designed For Water Flow Applications

Absolute Quality:

PRM offers rotameters for Water Flow Applications. PRM rotameters are scaled for gallons per minute or liters per minute in different flow ranges and sizes.

The PRM difference: PRM has seen many misapplications with rotameters through the years, especially in the remediation industry. We have designed meter sizes that provide an ample working range and are less prone to failure through impact exposure. These water flow meters come standard with Viton® O-rings and seals and provide a fine scale control for a higher degree of accuracy.

Customized Solutions:

PRM can provide meters scaled for custom applications. Typical lead time is 3-5 weeks from time of order. Custom meters require a minimum quantity commitment of 50 meters.

Standard Features Include:

- Acrylic body—replaceable end tails
- 316 SS plunger and travel rod
- Viton® O-rings and seals
- Maximum pressure 85 psi
- Maximum Temperature 125°F
- Accuracy $\pm 4\%$
- NPT Connections

** Models **

- FMZ40045GPM: 1-5 GPM, 1/2" FNPT
- FMZ400410GPM: 1-10 GPM, 1" FNPT
- FMZ4004: 1-20 GPM, 1" FNPT
- FMDFG2540G: 5-40 GPM, 1" FNPT
- FMDFG52: 40-120 GPM, 2" FNPT

** Options **

- Flow limit switches
- Stainless Steel End Connections
- Flow Range Limit Snubbers
