

Industry Standard Liquid Filter Bags made with the highest grade material to offer you quality and efficiency in each bag.

Features:

- Nylon Monofilament Mesh Bags:
 - Monofilament mesh bags provide extra strength and abrasion resistance
 - Mesh materials produce predictable results for consistent performance
 - Chemical Compatibility with wide range of contaminants
- Polypropylene Ring (standard)
 - Molded plastic with built-in handle for cleaner installation and disposal, less expensive
 - Smooth plastic design prevents build-up of contaminants around top of bag
 - Collar is welded into place for stability
- PRM keeps in stock
#2 size bags (7-1/16" dia x 32" L)
- Maximum Temperature: 275°F
- Sewn Seam using 5 line system
- Available in 37µm, 74µm, 149µm, 420µm, 595µm, and 707µm

<i>NYLON COMPATIBILITY</i>	
Mineral Acids	Poor
Organic Acids	Fair
Alkalis	Good
Oxidizing Acids	Poor
Animal/Vegetable Petro Oils	Excellent
Organic Solvents	Excellent
Micro Organisms	Excellent
