

Portable Ozone (O₃) Gas Detector

Portable O₃ gas detector with alarm monitors ambient ozone concentration in ranges of 0 to 100ppm with LCD display and high precision sensor.

Features:

- LCD dot matrix display, direct readout of gas type, unit, concentration, local time, etc.
- Built-in micro-sampling pump
- Zero calibration functions makes detection more accurate and reliable.
- One key to restore factory settings
- Settable alarm point, if concentration exceeds alarm value, detector emits alarm sound, screen displays limits and indicator light turns red and flashes
- Rechargeable lithium polymer battery with large capacity.
- High-strength engineered plastic housing, anti-slip, waterproof, dustproof
- Aluminum carrying case with custom foam

Sampling Method	Pump Suction
Accuracy	≤±3% F.S.
Response Time	≤ 10s
Operating Temperature	-4°F to 122°F
Operating Humidity	0~95%RH
Operating Pressure	11 to 17 psi
