## REMOTE MONITORING SOLUTIONS

Sensaphone IMS-400

Expandable Web Based Monitoring

# ASSURANCE

COUNTLESS INDUSTRIES DEPEND ON SENSAPHONE FOR THE MOST COMPREHENSIVE REMOTE MONITORING SOLUTIONS AVAILABLE. WHEN YOU NEED TO BE ABSOLUTELY SURE A REMOTE SITE IS STABLE, SECURE AND MONITORED AROUND THE CLOCK, THERE'S NO SUBSTITUTE FOR CERTAINTY.

## Easy to use – everyday

The Sensaphone IMS-4000 is easy to use. If you do have questions, we offer free tech support.

## We've got a sensor for that

Sensaphone has a sensor for monitoring everything from environmental conditions to equipment status and more.

## Your business is our business

With over 400,000 systems installed worldwide, we've put Sensaphone to the test in just about every application imaginable.

## Suggested Applications

### Data Center

Use your IMS-4000 to monitor equipment status, temperature, power failure and other environmental and security conditions in one room, one building, or across the globe.

### Medial Cold Storage

Don't find out that your freezer has stopped running until the next morning. The Sensaphone IMS-4000 will call or e-mail as soon as the temperature reaches a temperature you set.

# Sensaphone IMS-4000

## A Complete, Reliable Monitoring Solution for Your Data Center

### Product Overview

- Ethernet-based device management for server rooms, data centers, and IP devices
- PC-based management software lets users view status, make changes and review history
- Receive voice alerts and alarm notifications through standard Ethernet/telephone connections
- Program customizable voice alerts, e-mails, and text-message notifications

The Infrastructure Monitoring System (IMS-4000) is the answer for web-based monitoring of critical environmental conditions across your entire infrastructure. Featuring a rack-mountable host, integrated voice dialer and reliable solid-state storage; this simple-to-install package is ideal for both small rooms and large data centers. Each sensor input features LEDs to indicate status while alarm LEDs show when power, IP, or battery alarms have been triggered.

- Connect up to 31 expansion nodes to monitor additional inputs across LANs and WANs
- Included relay output can switch local devices on/off based on alarm activity
- Internal microphone and external microphone jack monitor for audible alarms
- Plug-and-Play Wireless Sensors make network setup and expansion easy

### Expansion Options

#### IMS-4000 Node

The IMS-4000 Node allows IMS-4000 users to expand their infrastructure and monitor additional inputs in locations away from the IMS-4000 Host. Up to thirty-one Nodes can be used with each IMS-4000 Host. Much like the Host, the Node can monitor eight inputs for environmental conditions and or alarm contacts from other computer equipment such as UPS systems.

#### IMS-4000 Node

The IMS-4000 Wireless Node extends the environmental monitoring capability of your IMS-4000 system by implementing Wireless Sensor technology. The Node can work with up to 8 wireless sensors. The unit will wirelessly communicate with the sensors, then transmit their status back to your IMS-4000 host via its Ethernet connection. Wireless sensors are available to monitor Temperature, Humidity, Water on the Floor, Power, Dry Contacts, and 4-20mA signals.
