# TopSide Bolt-On Tool Tray

## Parts List

A

Tray x1

B

Bracket x1

C

Tray Shaft x1

E

Allen Bolt x2

F

Locking Washer x2

G

Nut x1

H

Hex Bolt x1

I

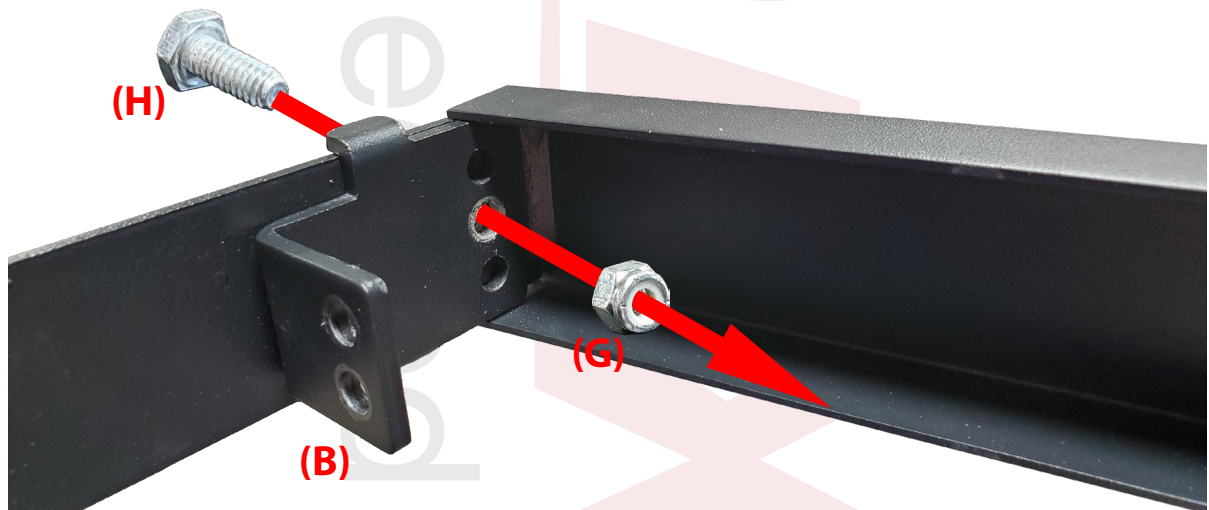

Allen Wrench x1

## REQUIRED TOOLS:

Allen Wrench (included), 13mm / Adjustable Wrench

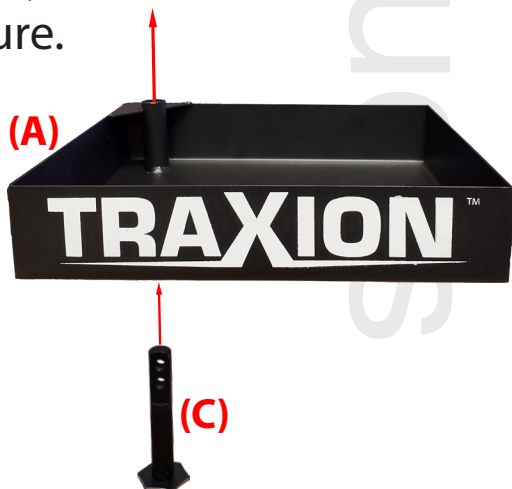

### 1 Attach bracket to Topside Creeper

Using a wrench, attach the wider side of the bracket (B) to the inside of the front of your Topside Creeper with the hex bolt (H) and nut (G) in the middle hole, it should be flush with the side of the Topside Creeper.

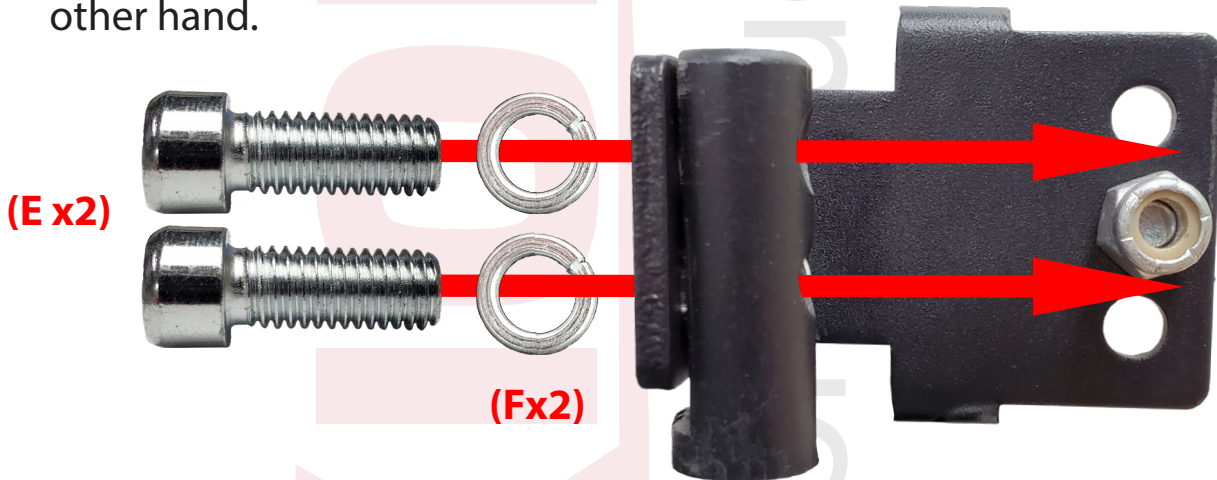

### 2 Insert Tray Shaft into Tray

Slide the tray shaft (C) through the tray (A) from the bottom with the flat side facing the side of the tray, as shown in the picture.

### 3 Attach Tray to Bracket

Using the included allen wrench, attach the bracket to the flat side of the tray shaft with 2 locking washers (F) and allen bolts (E). Make sure the shaft stays in the tray. You can do this easily by holding the tray near the corner and placing one hand under the insert while putting the bolts in with your other hand.

Don't forget, your Tool Tray can rotate!
