

Cuff Studio

Installation Instructions

Pill Pendant

Includes:

Cross Bar x 1
Wire Nuts x 3
1/8" x 2-3/4" IPS All Thread Nipple x 1
Large Zip Ties x 1
Small Zip Ties x 5
E26 Feit Electric 60W Equivalent 2700K Bulb A19

1. Ensure that j-box can sustain the overall weight of fixture. Reinforce if necessary.
2. Feed electrical wires through provided threaded pipe.
3. Attach all respective electrical wires to ceiling housing.
4. Attach provided threaded pipe to j-box, and slip rope wrapped canopy over threaded pipe. Then attach main pendant loop to threaded pipe and canopy.
5. Raise the cotton knot to the canopy. Add a zip tie to the base of the knot as needed to keep knot in place.
6. Each pendant is provided with 16' drop rope which can be adjusted on-site to the preferred overall drop. Adjust drop by untying the knot that sits at the underside of the spider. Once overall drop is at desired height re-tie the knot and trim excess rope.
7. Install provided light bulbs.
8. Raise the shade over the spider. It should sit level on its spider bracket.
9. As an extra safety precaution, attach the metal clip located at the edge of the globe opening to the security chain on the spider bracket.
10. Additional plastic zip ties may be used as desired to fasten the wire to the cotton rope so that rope and wire are snugly aligned.
11. After each zip tie is applied, trim the zip tie tale. Extra zip ties are provided. Apply zip ties per installer discretion, but typically 1-2 zip ties are used per foot of rope/wire.

Care: Dust regularly with a soft dry cloth or feather duster. Do not use a wet cloth or any chemical cleansers. Professional installation by a certified electrician recommended.
