

Ondeis-GAMA Interface Module Model OG-1

Quick Start Guide

USE:

The OG-1 Interface Module provides a quick and easy way to provide rain sensing (using a Somfy-Ondeis rain sensor) for a GAMA RF340-4PR-ASL controlled **EQUINOX** louvered roof system. A complete installation can be accomplished in three easy steps.

INSTALLATION AND COMISSIONING:

1. Unpack and charge the provided Ondeis/Somfy Rain Sensor by placing it face up in the sun for a minimum of 20 minutes. The sensor can be mounted in the final desired location prior to or after charging.
2. Connect 120/60/1 power to the OG-1 Module power cord and connect the red/black OG-1 output wires to the GAMA RF340-4PR-ASL Receiver/Controller per the attached wiring diagram.
3. Power up your system and test operation by pouring water on the rain sensor with the louvers in the open position. The louvers will automatically close in approximately 5 seconds.

INSTALLATION COMPLETE!
