LA NOSTRA AZIENDA

K39 Srl è una giovane realtà con sede nell'immediato hinterland milanese, a Garbagnate Milanese.

Fondata nel 2016, l'azienda parte da un pedigree importante nel settore degli accessori auto. I fondatori provengono da aziende di produzione e commercializzazione di accessori e ricambi con esperienza pluridecennale. L'azienda produce e commercializza barre portatutto, porta bici e porta sci. La costruzione degli stampi trancia e stampi iniezione materia plastica per la produzione dei propri articoli avviene interamente all'interno di K39 SRL grazie ad un reparto macchine a controllo numerico.

Recentemente K39 Srl è entrata a far parte del gruppo industriale facente capo a Profilati Alluminio Srl, azienda storica italiana attiva nell'estrusione di profili in alluminio, che comprende anche R.C. Srl specializzata nelle lavorazioni meccaniche su alluminio. Questo passaggio importante ha permesso a K39 Srl di portare avanti numerosi nuovi progetti che vedranno la luce nei prossimi mesi oltre a potersi avvalere, come unico player del settore accessori, ad una produzione "interna" di profilati di alluminio, garanzia quindi di un costante approvvigionamento di materiale direttamente dal produttore. L'azienda è operativa sia sul mercato nazionale che su quello europeo grazie ad una rete di funzionari di Vendita e di distributori.

OUR COMPANY

K39 Srl is a young company based in the immediate Milan hinterland, in Garbagnate Milanese.

Founded in 2016, the company starts from an important pedigree in the car accessories sector. The founders come from companies producing and marketing accessories and spare parts with decades of experience.

The company manufactures and sells roof bars, bike racks and ski racks.

The construction of shearing molds and plastic injection molds for the production of its own articles takes place entirely within K39 SRL thanks to a CNC department.

Recently K39 Srl became part of the industrial group headed by Profilati Alluminio Srl, historic Italian company active in the extrusion of aluminum profiles, which also includes R.C. srl specialized in mechanical processing of aluminium. This important step allowed K39 Srl to carry out various new projects that will see the light in the coming months as well as be able to avail itself, as the only player in the car accessories sector, of an own production of aluminium profiles, therefore guaranteeing a constant supply of material directly from the producer.

The company operates on both national and European markets thanks to a network of official Sales points and distributors.
