Sizing: We currently have one size available that is customizable and fits a wide range of foot and leg sizes. On the large end it fits up to a US men's 13. On the small end, the brace is only limited to length of the patient's lower leg. The patient's lower leg must be at least 12 inches when measured from the bottom of heel to center of knee. The typical cutoff age is between 8 and 10 years old.
