

MEASURING INSTRUCTIONS

Please read the following instructions carefully before completing the form. It is important to take care when measuring, this helps us provide you with boots that fit perfectly. Measurements must be taken in centimeters and must be taken whilst wearing your usual riding legwear. You may find it easier if someone else does the measuring.

- A** Height measurement - Measure from the crease of the knee (with a slightly bent leg) down to the floor
- B** Circumference of the leg just under the knee
- C** Circumference at the widest point of the calf
- I** Circumference at 20cm from the ground - Measure 20cm up the leg and take the circumference at that point
- D** Circumference at 15cm from the ground - Measure 15cm up the leg and take the circumference at that point
- E** Circumference around the instep/heel - Measure around the heel to the front of the ankle (as shown in the image)

Take your **A** and **B** measurements with your leg in this position

Every other measurement with your leg in this position

Right Leg: **A:** **B:** **C:** **I:** **D:** **E:**

Left Leg: **A:** **B:** **C:** **I:** **D:** **E:**
